What is Node.js? Node.js is an open-source, cross-platform JavaScript runtime environmer
It executes JavaScript code outside of a web browser using the Google Chrome V8 engine
Node.js uses an event-driven, non-blocking I/O model that makes it lightweight and efficien

Node.js Module System: Node.js has a built-in module system based on CommonJS and E
It allows developers to import external libraries, core built-in modules like fs and http,
and thousands of third-party npm packages to build high-performance network applications
